Vintage Eskimo Inuit Beaded Mittens Glove Leather & Fur

Description:

This is a pair of authentic Eskimo or Indian gloves. These are hand-beaded and the detail is incredible! The fur is somewhat patchy in areas, but for the most part completely lines the cuffs. They measure 12" long by 6" wide and seem to be very sturdy! Great collectible!

Inuit Beaded Mittens

Jennifer's Story (eBay ID: precisionbluing)

A woman brought me a pair of Inuit mittens that her girlfriend had found in grandpa's garage after he had passed away. The girlfriend wanted to throw them away, but Ellen snatched them away from certain death in the dumpster and brought them to me. She had nothing on their history and her friend said she never knew of her grandfather doing much traveling, so their story was lost, but the winner was thrilled to have found them anyway! This was by far the best auction we have had yet!

Well, after having had a solid scolding from Lynn at eBay Live with

regard to selling anything on consignment for less than 50% because "It's NOT WORTH YOUR TIME, Jennifer!" This was our last big hurrah for my consignment sales...Upon returning home from Boston I vowed "No more!" My assistant is just getting the hang of eBay and I have handed all consignment sales over to her! I am now enjoying my estate and yard sales much more knowing I am pocketing 100% of the monies and not working so much to have to hand the money over to someone else!
